

Data-level (P.b, b^2) factorization test: exact-match ratios at $\eta|v|/a = 8$, $P_L = -1$

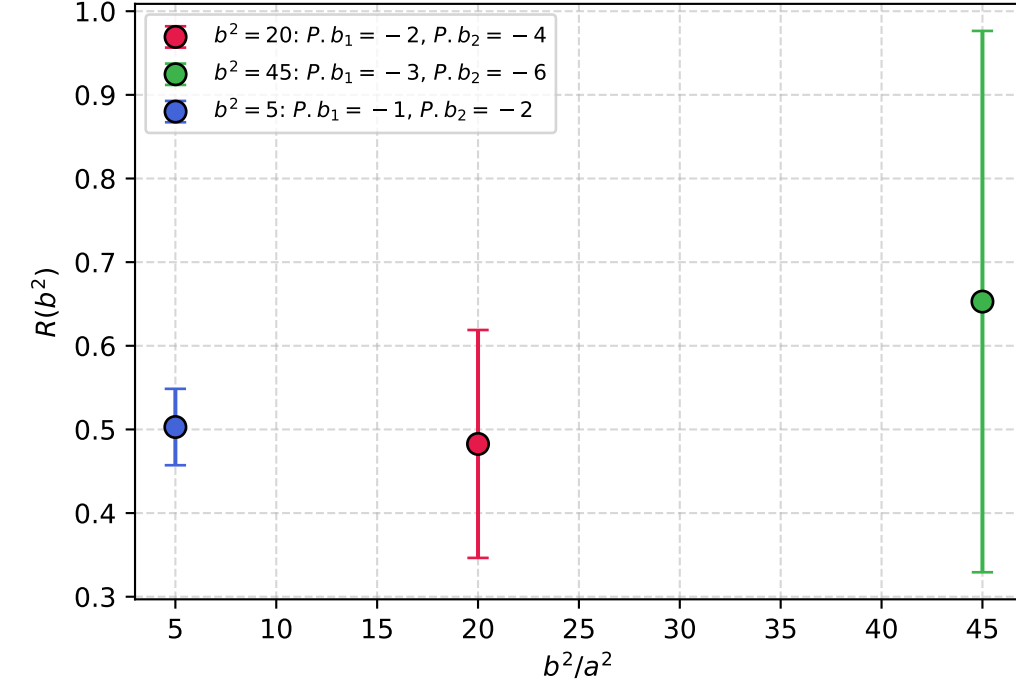

$\tilde{A}_{2B}^{Re}$: $R(b^2) = A(P.b_1, b^2)/A(P.b_2, b^2)$

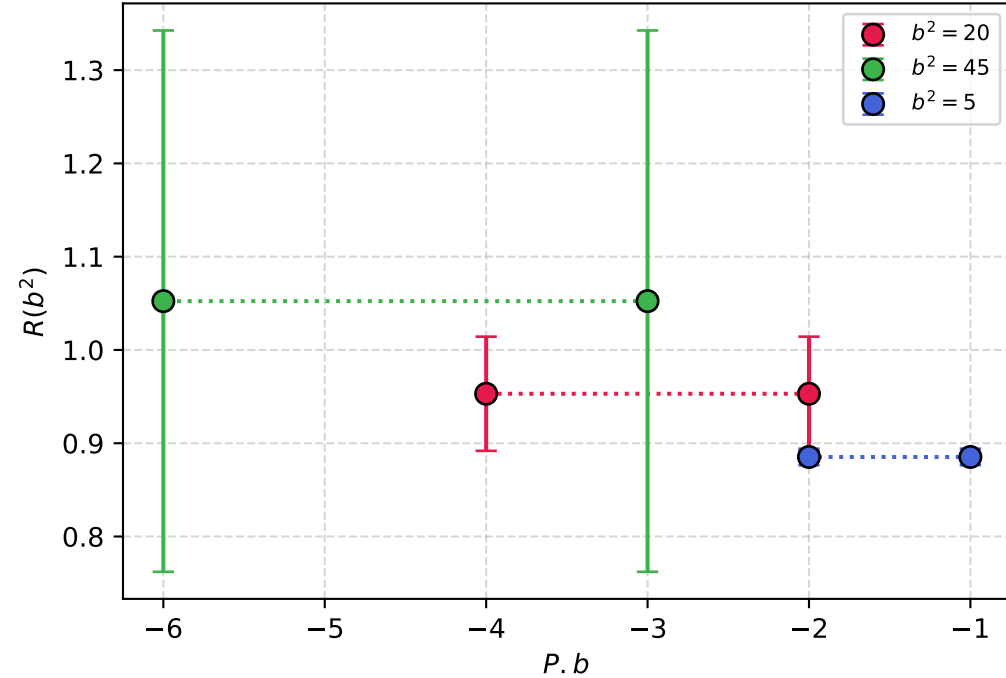

$\tilde{A}_{12B}^{Re}$: $R(b^2) = A(P.b_1, b^2)/A(P.b_2, b^2)$

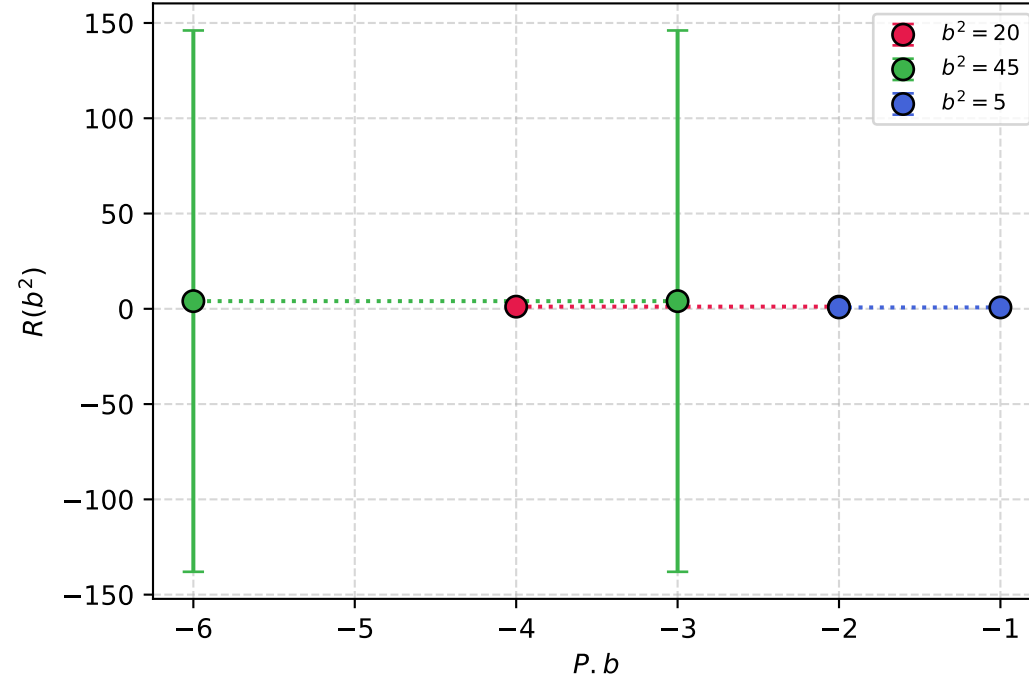

$\tilde{A}_{2B}^{Im}$: $R(b^2) = A(P.b_1, b^2)/A(P.b_2, b^2)$

$\tilde{A}_{2B}^{Re}$: same ratios, shown at their actual $P.b_1, P.b_2$

$\tilde{A}_{12B}^{Re}$: same ratios, shown at their actual $P.b_1, P.b_2$

$\tilde{A}_{2B}^{Im}$: same ratios, shown at their actual $P.b_1, P.b_2$
