

ReA2B: Direction A Ratio Test (Fix P.b pair, scan b^2)

Ratio of P.b=2.0 to P.b=4.0

- Target $b^2=5.0$
Num: $f(\text{P.b}=2.0, b^2=5.0)$
Den: $f(\text{P.b}=4.0, b^2=17.0)$
- Target $b^2=8.0$
Num: $f(\text{P.b}=2.0, b^2=8.0)$
Den: $f(\text{P.b}=4.0, b^2=17.0)$
- Target $b^2=17.0$
Num: $f(\text{P.b}=2.0, b^2=20.0)$
Den: $f(\text{P.b}=4.0, b^2=17.0)$
- Target $b^2=20.0$
Num: $f(\text{P.b}=2.0, b^2=20.0)$
Den: $f(\text{P.b}=4.0, b^2=20.0)$
- Target $b^2=32.0$
Num: $f(\text{P.b}=2.0, b^2=20.0)$
Den: $f(\text{P.b}=4.0, b^2=32.0)$

Ratio of P.b=1.0 to P.b=3.0

- Target $b^2=2.0$
Num: $f(\text{P.b}=1.0, b^2=2.0)$
Den: $f(\text{P.b}=3.0, b^2=18.0)$
- Target $b^2=5.0$
Num: $f(\text{P.b}=1.0, b^2=5.0)$
Den: $f(\text{P.b}=3.0, b^2=18.0)$
- Target $b^2=18.0$
Num: $f(\text{P.b}=1.0, b^2=5.0)$
Den: $f(\text{P.b}=3.0, b^2=18.0)$
- Target $b^2=45.0$
Num: $f(\text{P.b}=1.0, b^2=5.0)$
Den: $f(\text{P.b}=3.0, b^2=45.0)$
